

COVID-19 UPDATE - 6 AUG 2020

We are pleased to report that there have been no new COVID-19 cases within the Mansfield Shire or Mt Buller & Mt Stirling Resorts today and that there have been no new cases since Thursday 30th July 2020.

Contact tracing has been undertaken with all 4 positive cases. This process identified a number of close contacts who have also been tested and are isolating. Thankfully their results have all been negative thus far.

We are so grateful to these people for complying with isolation requirements. Their actions have been critical in stopping the further spread of this virus within our community.

Mansfield District Hospital, Mansfield Medical Clinic and Central General Practice completed 24 tests today. Since the beginning of August we have conducted more than 150 tests and to date all results have been negative. Having a COVID -19 swab when you have any respiratory symptoms is vital in helping our community fight off this virus.

Please act quickly if you believe you need to be tested. If you are unsure call the testing clinic on 0428 694 968 or your local GP practice and a nurse will help determine if you should be tested.

Our testing focus is on meeting the high demand within the Mansfield area. Given the closure of Mt. Buller and Mt. Stirling Resorts to visitors, the testing clinic on Mt Buller will be scaled back according to need.

We would like to remind everyone that stage 3 restrictions apply throughout our region as from 11:59pm on Wednesday 5 August 2020.

**THERE IS NO DOUBT THAT THESE ARE TOUGH
TIMES. LETS REMEMBER TO DO THE RIGHT THING
AND LOOK OUT FOR EACH OTHER.**
