

COVID-19 UPDATE - 7 AUG 2020

Today we report that there is one additional confirmed COVID-19 case within the Mansfield Community, taking our active confirmed cases to five.

It is anticipated that by early next week four of those five cases, will be symptom free and no longer be considered active and their period of isolation will have expired.

It is reassuring that the latest case has been isolating prior to developing symptoms. This is another great example of our community doing the right thing right from the 'get go' and helping us to contain the spread of the virus.

We should all be appreciative of the responsible action taken by this Mansfield resident and we wish them a speedy recovery.

Once again this shows how infectious COVID-19 is and highlights the need for us to remain vigilant at all times. Our testing clinic continues to operate seven days per week.

Today together with the Mansfield Medical Clinic and Central General Practice we undertook 16 tests. Testing is a high priority of the Victorian Government and there is in excess of 20,000 tests undertaken each day.

**LETS REMEMBER TO DO THE RIGHT THING AND
LOOK OUT FOR EACH OTHER.**
